Subject: Just off the phone with Frithsen RE Synthesis "green light"

Apparently there is an email chain going on between him, Sussman, Stoner, Bob P. Lek, and Kapocis (I think that's who) in which Sussman said something to the effect of "since when do we have the green light? Did I miss something?" So Frithsen has a message in to him to ask what the issue is, but no response yet. So he's working on circulating the FR notice for review but without communicating a target date to SAB until he hears from Sussman.

Just thought you should know that the front office delay is apparently still there. I would really like to know if there is a problem that we can address. I have offered to draft communications materials, but ORD has taken on that task. I can't think of anything else.

Thanks,
Rachel
